Pre-Meeting Preparation — Product Epics and Acceptance Criteria

⚠ **Classification:** INTERNAL USE ONLY

This page translates the attached pre-meeting preparation material into a product view covering the end-to-end journey from meeting context through customer-ready preparation and follow-up. Priorities are defined as **P0** for MVP, **P1** for the next release and **P2** for a later release.

Product vision and journey

Product promise: One trusted, explainable and editable preparation flow, integrated with Salesforce and usable offline.

1. **Frame:** Set the customer, purpose, season and available time.
2. **Understand:** Build trusted customer, territory and market context.
3. **Prepare:** Create the brief and conversation plan.
4. **Equip:** Generate editable customer-facing materials.
5. **Align and use:** Review, govern and access the package in the field.
6. **Follow up:** Capture outcomes and measure value.

ℹ **Design principles:** Customer-ready output • Full-portfolio visibility • Human decision authority • Evidence and source traceability • Internal and external information separation

Epic overview

Epic	Outcome	MVP focus
E1 Meeting, Customer and Territory Context	Start preparation with the correct customer, purpose, season, territory and commercial context.	Customer, meeting type, season, route to market, maturity, objectives and duration.
E2 Customer, Territory and Market 360	Create a trusted analytical view of customer, territory, portfolio and market.	Sales performance, visit history, approved technical content, full portfolio, provenance and freshness.
E3 Unified Content Library and Enterprise Search	Provide one searchable access point to approved content.	Search selected Salesforce, Teams, Trinity and regional content with filters and source links.
E4 Customer-Specific Brief and Narrative Generation	Generate a meeting-ready package tailored to context	Marketing plan, negotiation, business review and in-

	and speaking time.	season templates with risks and refresh.
E5 Recommended Talking Points and Actions	Convert information into prioritized, explainable and editable guidance.	Evidence-backed talking points, differentiation, growth levers and full user control.
E6 Editable Customer-Facing Presentations	Create concise, modern and fully editable presentations suitable for customers.	Approved content, confidential-data separation, native PowerPoint elements, tailoring and compliance.
E7 Regional Collaboration and Review	Enable validation, improvement and sharing without losing traceability.	Regional master content, customer selection, review, annotation and preservation of edits.
E8 Mobile and Offline Experience	Make preparation available within the sales workflow, including low-connectivity locations.	Salesforce entry, mobile/tablet use, offline download and refresh visibility.
E9 Security, Configuration, Content Governance and Scale	Provide secure, auditable and configurable deployment across countries and routes to market.	Role-based access, traceability, stale-data warnings, country compliance and auditability.
E10 Meeting Follow-Up, Feedback and Value Measurement	Connect preparation to follow-up and measure productivity and commercial value.	Written post-meeting capture and pilot baseline measurement; broader integration follows.

Epic 1 — Meeting, Customer and Territory Context

Outcome: Make preparation relevant from the beginning by capturing the commercial context that determines content and format.

User stories

- **US1.1 [P0]:** Select the customer.
- **US1.2 [P0]:** Select the meeting type.
- **US1.3 [P0]:** Capture the seasonal context.
- **US1.4 [P0]:** Recognize route to market, including wholesalers, cooperatives, retailers, purchasing groups and growers.

- **US1.5 [P0]:** Capture customer maturity: new, developing or mature.
- **US1.6 [P0]:** Define up to three fact-based meeting objectives.
- **US1.7 [P0]:** Capture meeting duration and adjust recommended content volume.
- **US1.8 [P1]:** Reuse calendar timing and participants.
- **US1.9 [P1]:** Support regional workflows within a common process.

Acceptance criteria

- [ ] The user can select and confirm a valid Salesforce customer before generation.
- [ ] The user can select a supported meeting type, season and route to market.
- [ ] The user can record no more than three fact-based objectives.
- [ ] Meeting duration changes the recommended content volume.
- [ ] Missing calendar fields are clearly identified and do not block manual completion.

Epic 2 — Customer, Territory and Market 360

Outcome: Create one trusted view of performance, commitments, products, territory and market opportunities.

User stories

- **US2.1 [P0]:** Retrieve purchase history, account plans and planned volumes.
- **US2.2 [P0]:** Compare actual performance with objectives and product targets.
- **US2.3 [P0]:** Consolidate visit history, commitments and open actions.
- **US2.4 [P1]:** Include authorized commercial terms and GP-waterfall information.
- **US2.5 [P1]:** Estimate hectare potential and Syngenta share.
- **US2.6 [P0]:** Include approved trial, product and technical information.
- **US2.7 [P1]:** Add weather, crop, disease and pest context.
- **US2.8 [P1]:** Add approved competitor, panel, pricing and market information.
- **US2.9 [P0]:** Cover 100% of the relevant portfolio, including lower-volume products.
- **US2.10 [P0]:** Flag regulatory, supply and technical developments.
- **US2.11 [P0]:** Show source, last-updated date and confidence for material insights.

Acceptance criteria

- [ ] Connected data is consolidated using common customer, product and territory identifiers.
- [ ] Actuals, objectives, targets, visit history and actions are shown in a customer context.
- [ ] The view includes the complete relevant portfolio, not only high-volume products.
- [ ] Each material insight displays its source, date and confidence.
- [ ] Conflicting, stale, missing or low-confidence information is flagged rather than silently resolved.
- [ ] Sensitive commercial information is restricted according to role and source permissions.

Epic 3 — Unified Content Library and Enterprise Search

Outcome: Make approved commercial, technical, product and market content searchable from one place.

User stories

- **US3.1 [P0]:** Search approved content across connected repositories.
- **US3.2 [P0]:** Filter by customer, product, crop, competitor, region, meeting type and owner.
- **US3.3 [P0]:** Search presentations, competitor information, launch materials, trials and technical content.
- **US3.4 [P0]:** Find regional and central content.
- **US3.5 [P1]:** Search approved external sources such as Chambers of Agriculture and CETA.
- **US3.6 [P1]:** Ask natural-language questions.
- **US3.7 [P1]:** Summarize recurring themes across relevant sources.
- **US3.8 [P0]:** Open the original source.
- **US3.9 [P0]:** Identify owner, approval status and validity date.
- **US3.10 [P0]:** Respect source-system permissions.

Acceptance criteria

- [ ] Search returns results only from approved and connected repositories.
- [ ] Users can filter results using the agreed customer, product, crop, region and meeting metadata.
- [ ] Each result identifies its source and provides a direct link to the original record or document.
- [ ] Approved version, content owner and validity date are visible.
- [ ] Results and summaries are permission-filtered before display.
- [ ] Natural-language summaries, when enabled, include supporting source references.

Epic 4 — Customer-Specific Brief and Narrative Generation

Outcome: Generate one consolidated package tailored to the customer, territory, season, meeting type and available speaking time.

User stories

- **US4.1 [P0]:** Generate a consolidated brief.
- **US4.2 [P0]:** Generate a customer marketing plan for autumn and spring meetings.
- **US4.3 [P0]:** Generate a negotiation brief covering performance, commitments, opportunities, risks and approved parameters.
- **US4.4 [P0]:** Generate a business review.
- **US4.5 [P0]:** Generate an in-season brief.
- **US4.6 [P1]:** Generate a team-launch package.
- **US4.7 [P0]:** Adapt content to meeting duration.
- **US4.8 [P0]:** Build a funnel narrative from issue to technical rationale to product solution.
- **US4.9 [P0]:** Suggest a timely opening hook.
- **US4.10 [P0]:** Limit key messages to no more than ten per product.
- **US4.11 [P0]:** Surface commercial, competitive, regulatory, supply and agronomic risks.
- **US4.12 [P0]:** Refresh the package when source data changes.

Acceptance criteria

- [ ] The user can generate the supported MVP brief types from confirmed context.
- [ ] The brief adapts to available time using configurable guidance, including approximately 40 slides for one hour and 90 slides for two hours.
- [ ] The narrative follows issue → technical rationale → product solution unless the user changes the structure.
- [ ] The brief includes a proposed opening hook and clearly identifies risks and data gaps.
- [ ] Generation time, source freshness and refresh status are visible.
- [ ] The user reviews the generated package before it is treated as final.

Epic 5 — Recommended Talking Points and Actions

Outcome: Turn customer and market information into prioritized, evidence-backed and editable conversation guidance.

User stories

- **US5.1 [P0]:** Recommend talking points based on customer, territory and meeting objective.
- **US5.2 [P0]:** Explain evidence, rationale, source and confidence.
- **US5.3 [P0]:** Show concise product differentiation across positioning, technical value, price, launch approach and competitors.
- **US5.4 [P0]:** Identify territory growth levers.
- **US5.5 [P0]:** Include full-portfolio opportunities.
- **US5.6 [P1]:** Suggest discovery questions.
- **US5.7 [P1]:** Provide technical reminders.
- **US5.8 [P1]:** Rank by urgency and customer value.
- **US5.9 [P0]:** Allow users to accept, edit, reorder or remove every recommendation.

Acceptance criteria

- [ ] Every displayed talking point has a supporting source, rationale and confidence indicator.
- [ ] Recommendations are limited and prioritized to avoid overwhelming the user.
- [ ] Product differentiation is concise and uses approved information only.
- [ ] Full-portfolio opportunities are considered, including lower-volume products.
- [ ] The user can accept, edit, reorder or remove each recommendation.
- [ ] Unsupported, restricted or low-confidence recommendations are blocked or clearly marked.

Epic 6 — Editable Customer-Facing Presentations

Outcome: Produce modern, concise and editable PowerPoint material that can be shown directly to the customer.

User stories

- **US6.1 [P0]:** Include only content approved for customer presentation.
- **US6.2 [P0]:** Use internal data for analysis without exposing it in the final deck.
- **US6.3 [P0]:** Generate editable text, charts, tables, logos and visuals.
- **US6.4 [P0]:** Avoid flattened slide images.

- **US6.5 [P0]:** Tailor material by crop, product, customer interest, route to market and purpose.
- **US6.6 [P1]:** Replace product brands consistently where configured.
- **US6.7 [P0]:** Include approved local or regional trial results.
- **US6.8 [P0]:** Provide a complete crop-portfolio overview.
- **US6.9 [P1]:** Apply a modern visual style.
- **US6.10 [P0]:** Support presentation, tablet and print outputs.
- **US6.11 [P0]:** Apply local claims, disclaimers, language and branding.

Acceptance criteria

- [ ] Exported material contains only content approved for external use.
- [ ] Confidential sales, pricing, profitability and analytical inputs are excluded from customer-facing output.
- [ ] Text, charts, tables, logos, visuals and brand names remain editable in PowerPoint.
- [ ] The deck can be tailored to the customer, crop, product, route to market and meeting purpose.
- [ ] Trial content retains geography, methodology, date and limitations where applicable.
- [ ] Country-specific language, claims, disclaimers and branding are validated before export.
- [ ] Presentation, tablet and print-ready outputs can be generated.

Epic 7 — Regional Collaboration and Review

Outcome: Enable sales, management and technical teams to improve the package while preserving traceability and user edits.

User stories

- **US7.1 [P0]:** Co-create a regional master presentation.
- **US7.2 [P0]:** Select from a regional content pool.
- **US7.3 [P0]:** Collaborate in the same PowerPoint with authorized contributors.
- **US7.4 [P0]:** Adapt content locally.
- **US7.5 [P0]:** Review, edit and annotate.
- **US7.6 [P1]:** Request technical input.
- **US7.7 [P1]:** Support coaching before customer use.
- **US7.8 [P1]:** Maintain reusable technical content.
- **US7.9 [P1]:** Share with authorized participants.
- **US7.10 [P0]:** Preserve approved changes after refresh.
- **US7.11 [P1]:** Maintain version history.

Acceptance criteria

- [ ] Authorized contributors can work from a regional master content set.
- [ ] Sales Representatives can select and adapt a customer-specific subset.
- [ ] User-authored changes are distinguishable from source-generated content.
- [ ] Approved user edits are retained when the package is refreshed.
- [ ] Sharing is limited to authorized colleagues and participants.
- [ ] The current version and material changes are identifiable.

Epic 8 — Mobile and Offline Experience

Outcome: Embed preparation into the existing field workflow and support use in locations with limited connectivity.

User stories

- **US8.1 [P0]:** Open preparation from the Salesforce customer record.
- **US8.2 [P1]:** Open the package from planners, dashboards or calendars.
- **US8.3 [P0]:** Use the experience on mobile and tablet.
- **US8.4 [P0]:** Download the briefing and customer materials for offline use.
- **US8.5 [P1]:** Synchronize authorized changes after reconnection.
- **US8.6 [P1]:** Configure Outlook reminders.
- **US8.7 [P1]:** Control reminder frequency.

Acceptance criteria

- [ ] A user can open preparation directly from a Salesforce customer record.
- [ ] Core preparation tasks are usable on supported mobile and tablet devices.
- [ ] Authorized briefings and customer materials can be downloaded securely for offline use.
- [ ] Download time and last-refresh time are visible.
- [ ] Offline content is encrypted, retained only for the approved period and removed according to policy.
- [ ] Synchronization conflicts preserve both versions until resolved by the user.

Epic 9 — Security, Configuration, Content Governance and Scale

Outcome: Protect sensitive information and support controlled rollout across countries and go-to-market models.

User stories

- **US9.1 [P0]:** Apply role-based access to customer, pricing, terms and profitability information.
- **US9.2 [P0]:** Separate analysis from customer-facing output.
- **US9.3 [P1]:** Configure country language, sources, claims, disclaimers and mandatory sections.
- **US9.4 [P0]:** Configure regional priorities.
- **US9.5 [P1]:** Manage meeting templates.
- **US9.6 [P0]:** Manage content owner, approval status and validity date.
- **US9.7 [P0]:** Flag missing, conflicting or outdated information.
- **US9.8 [P0]:** Maintain an audit trail.
- **US9.9 [P1]:** Support regional variation through configuration.

Acceptance criteria

- [ ] Access is evaluated using the user’s role and source-system permissions.
- [ ] Internal analysis and customer-facing output have visibly different classifications.
- [ ] Every approved content asset has an owner, status and validity date.
- [ ] Missing, stale, conflicting and low-confidence information is clearly flagged.

- [ ] Generation, source access, user edits, refreshes and exports are logged.
- [ ] Country and regional differences can be configured without separate development where approved.
- [ ] Security, accessibility, performance and audit tests pass before pilot acceptance.

Epic 10 — Meeting Follow-Up, Feedback and Value Measurement

Outcome: Connect preparation to post-meeting capture and establish evidence of productivity and commercial value.

User stories

- **US10.1 [P1]:** Start the visit report from the brief.
- **US10.2 [P1]:** Link Voice-to-CRM notes to the preparation package.
- **US10.3 [P0]:** Provide structured written post-meeting capture.
- **US10.4 [P1]:** Capture a small number of important figures quickly.
- **US10.5 [P1]:** Create follow-up actions with owners and due dates.
- **US10.6 [P1]:** Recognize that some sensitive information was exchanged outside the system.
- **US10.7 [P1]:** Capture relevance, accuracy, format and usefulness feedback.
- **US10.8 [P1]:** Measure preparation time before and after adoption.
- **US10.9 [P1]:** Measure content reuse.
- **US10.10 [P2]:** Compare commercial outcomes using an agreed evaluation method.

Acceptance criteria

- [ ] Users can capture structured written notes after the meeting without relying on voice recognition.
- [ ] Approved objectives and talking points can be transferred without duplicate entry when the integration is enabled.
- [ ] Follow-up actions can include a confirmed owner and due date.
- [ ] The system can record that some sensitive information was exchanged outside the digital workflow.
- [ ] Feedback captures relevance, accuracy, format and usefulness.
- [ ] Baseline preparation effort is measured before or during the pilot.
- [ ] Commercial impact is not attributed without an agreed, controlled measurement method.

Shared Definition of Done

A user story is complete when all applicable conditions below are met:

- [ ] The output uses only sources the user is authorized to access.
- [ ] Material insights display source and last-updated date.
- [ ] Recommendations are explainable and editable.
- [ ] Missing, stale, conflicting and low-confidence information is clearly identified.
- [ ] Internal-only and customer-facing information are visibly separated.
- [ ] Customer-facing materials use approved local claims, content, disclaimers, language and branding.
- [ ] The experience works within Salesforce desktop and supported mobile workflows.
- [ ] Required security, audit, accessibility and performance tests have passed.
- [ ] Sales, technical and pilot-country representatives have completed business acceptance.
- [ ] Acceptance evidence and known limitations are documented.

MVP scope and decision backlog

The MVP should demonstrate one end-to-end slice: frame the meeting, establish a trusted customer view, search approved content, generate an explainable brief, create editable customer-ready material, review it with authorized contributors, and access it through Salesforce, including offline download where supported.

1. **Validate the journey:** Confirm P0 stories and exit criteria with sales, technical and pilot-country representatives.
2. **Approve the MVP cut:** Confirm explicit inclusions and exclusions across all ten epics.
3. **Assign governance owners:** Identify owners for data, content, templates, compliance, technical validation, security and measurement.
4. **Prototype representative scenarios:** Include a customer marketing plan, negotiation, business review and in-season preparation scenario.
5. **Baseline current effort:** Measure preparation time, content discovery effort, reuse and quality before pilot launch.

Target value hypotheses

- Reduce non-customer-facing preparation activity by approximately **10–30%**, subject to pilot validation.
- Assess a potential **1–5%** win-rate uplift only through a controlled and validated measurement approach.

⚠ **Key control:** The solution supports commercial judgement; it does not replace it. Users must review, edit and approve generated briefs, recommendations and customer-facing materials before use.
