How to Get GitHub Copilot Access

ps:Follow these three phases to request and activate GitHub Copilot access using your Syngenta identity.

> ℹ **Before you begin:** Use your Syngenta email address and confirm that you can access the Syngenta Digital Slack workspace.

1 Create a GitHub account

1. Go to GitHub and select **Sign up**.
2. Register using your **Syngenta email address**.
3. Verify your email address using the confirmation message sent by GitHub.
4. Complete your GitHub profile and sign in.

> ⚠ Do not use a personal email address for this request. Your GitHub account must be associated with your Syngenta email address.

2 Accept the organization invitation

1. If you are not able to see the invitation go to https://github.com/syngenta-digital, you will see a button to accept invite at top.
2. Review the organization details and select **Join organization** or **Accept invitation**.
3. Confirm that **syngenta-digital** appears under your GitHub organizations.

3 Request Copilot Coding Agent access

1. Open the Syngenta Digital Slack workspace: http://syt-dpe.slack.com.
2. Navigate to the **#devops-help** channel.
3. Submit a request for **Copilot CodingAgentAccess**.
4. Include your GitHub username, Syngenta email address, and confirmation that you joined the **syngenta-digital** organization.
5. Monitor the channel for follow-up questions or confirmation that access has been granted.

> ✅ **Access request checklist:** GitHub account created with your Syngenta email, organization invitation accepted, and request posted in **#devops-help**.

4 Switch to your Syngenta GitHub account in VS Code Copilot Chat

1. Open **Visual Studio Code** and ensure the **GitHub Copilot Chat** extension is installed and enabled.
2. Select the **Accounts** icon in the lower-left corner of VS Code.

3. Open **Account Preferences** or **Manage Trusted Extensions / Account Preferences**, depending on your VS Code version.
4. Under GitHub authentication, choose the GitHub account associated with your **Syngenta email address**.
5. If your Syngenta GitHub account is not listed, sign out of the current GitHub account, then sign in again using the Syngenta GitHub account that belongs to the **syngenta-digital** organization.
6. Return to **Copilot Chat** and confirm that Copilot is using the Syngenta GitHub account before starting work.

> **Tip:** If Copilot Chat still uses the wrong account, reload VS Code after changing account preferences and verify the active GitHub account from the Accounts menu.

Quick reference

Phase	Required action	Completion check
1	Create a GitHub account with your Syngenta email	Email address verified and account accessible
2	Accept the invitation to **syngenta-digital** by visiting Syngenta Digital, you will see a button to accept invite at top.	Organization appears in your GitHub account
3	Request Copilot Coding Agent access in **#devops-help**	Request submitted and pending confirmation
